

## **ISO 9001 AS9100 Certification Press Release**

**Tucson Arizona, 9 November 2006**

Sean Mulholland, Vice President of Tucson Embedded Systems Inc. (TES), an Tucson Arizona Embedded Software and Systems Developer announced today that it has successfully implemented The Aerospace Quality Standard AS9100 as well as The International Quality Standard ISO 9001:2000.

Kelly Olms Quality Manager said that the organization's entire Quality Management System (QMS) was redesigned for the implementation. Being certified to the SAE AS9100 and ISO 9000 International Standards for quality gives assurances to our Aerospace and Defense customers that TES is committed to providing the highest quality products possible.

Many governments around the world are now requiring ISO 9000 Certification before they will consider a company's products for purchase. AS9100 adds many additional requirements necessary to address civil and military aviation and aerospace needs.

Tucson Embedded Systems Inc. specializes in the design, development, maintenance, implementation, testing, validation and verification of embedded systems and communication applications.
